THE

Gentleman and *Citizen's*

ALMANACK

For the Year of Our LORD, 1730.

Being the Second after Biſſextile or LEAP-YEAR.

CONTAINING

A Table of Terms, and Returns.
A Table of Eclipſes.
The Days of the Year, neceſſary for finding the Number of Days or Weeks between any two Days.
The Days of the Month.
The Week-Days, named at large.
The Holidays.
The Moon's Age, Change, Full, and Quarters.
The New Stile, or Gregorian Kalendar.
A Table of Equation, for a Clock or Watch, for every Day this Year.
A Tide Table.
A Table of the Price of Goods at 112*l.* to the Hundred.
The Poſt-Towns of IRELAND, newly corrected.
A Table of Twilight, for every 5th Day of the Year.
A Table of Coin.
A Table of Intereſt at 7 *per Cent.*
A Table of Purchaſe, at 6, 7, 8 and 10 *per Cent.* Compound Intereſt, from 1 Year to 31, &c.
A Table of the Weight of Houſhold Bread.
The Swearing Days of the Maſters of the Corporations of *Dublin*, with the preſent Maſters Names:
The Names of the LORD LIEUTENANT, the Judges of His Majeſty's Courts, Commiſſioners of the Revenue, *&c.*
The Names of the preſent Lord-Mayor, Sherriffs, and Aldermen of the City of *Dublin.*
The Marriages and Iſſues of the preſent Princes of EUROPE.
The Deaths of the late Kings and Princes of EUROPE.
With an Explanation of the whole prefixed.

Alſo the Roads and Fairs of IRELAND, in which all thoſe Miſtakes and Omiſſions in former ALMANACKS, which Gentlemen have been pleaſed to ſend Information of ſince the laſt Year, are carefully ſet right this Year.

DUBLIN: Printed for JOHN WATSON, Bookſeller on the *Merchant's-Key*, near the *Old-Bridge*, by JOHN GOWAN in *Back-Lane*.

Golden Number	2	Easter-Sunday, *Mar.*	29
Epact	22	Rogation-Sunday, *May*	3

From *June* 11th, 1729, to *June* the 11th, 1730, is the 3d Year of K. Geo. the Second's Reign.

The Act of Parliament for reducing Intereſt of Money to 7 *per Cent.* commenced *March* 25. 1722.

A Table of the TERMS in *IRELAND*, for 1730.

Hilary Term	Begins, *Jan.* 20 Sits, *Jan.* 23 Ends, *Feb.* 12	Retur.	Octab. Hill.	*Jan.* 20
			Quind. Hill.	*Jan.* 27
			Craſt. Purif.	*Feb.* 3
			Octab. Purif.	*Feb.* 9
Eaſter Term	Begins, *Apr.* 13 Sits, *Apr.* 15 Ends, *May* 11	Retur.	Quind. Paſ.	*Apr.* 13
			Treſ. Paſ.	*Apr.* 20
			Menſ. Paſ.	*Apr.* 27
			Quinq. Paſ.	*May* 4
			Craſt. Aſcen.	*May* 8
Trini. Term	Begins, *May* 25 Sits, *May* 29 Ends, *June* 17	Retur.	Craſt. Trin.	*May* 25
			Octab. Trin.	*June* 1
			Quind. Trin.	*June* 8
			Treſ. Trin.	*June* 15
Mich. Term.	Begins, *Nov.* 3 Sits, *Nov.* 6 Ends, *Nov.* 28	Retur.	Craſt. Anim.	*Nov.* 3
			Craſt. Mart.	*Nov.* 12
			Octab. Mart.	*Nov.* 18
			Quind. Mart.	*Nov.* 25

The ECLIPSES this Year 1730, will be 5.

The 1ſt of the Sun, Inviſible, *January* 7, at 6 at Night.

The 2d. of the Moon, viſible, *Friday*, *January* 23, Begins 9 Minutes after 2 in the Morning, laſts 1 Hour 54 Minutes, 3 Digits eclipſed.

The 3d. of the Sun, partly viſible, *Saturday*, *July* 4, Sun riſes 3 Digits eclipſed. It began 8 Min. after 2 in the Morning, Ends 5 Min, after 4.

The 4th. of the Moon, inviſible, *July* 18, at 4 in the Afternoon.

The 5th. of the Sun, inviſible, *December* 28, at 10 in the Forenoon.

This Year on *Thurſday* the 22d of *October*, 22 Minutes after Sun-ſet, there will be a Tranſit of Mercury over the Sun, viſible to Navigators in the Weſtern Ocean. In the Year 1736, on *October* 31, 25 Minutes after 10 in the Morning, the Planet Mercury will be ſeen like a black Spot in the Sun's Face, viſible to the Inhabitants of *Ireland*, as a Patch on a Woman's Face, and not unlike it, that Spot being the dark ſide of Mercury

THE EXPLANATION Of the following ALMANACK.

THE *First* Column is for the Days of the Year, and ſhews at one Subſtraction, the Number of Days between any two Days in the Year, and is uſeful for computing Servant's Wages, Rents, &c. for any broken Time, As ſuppoſe, I would know how many Days there are from *Febr.* 20. to *July* 7; at *Febr.* 20, I find 51; and at *July* 7, I find 188, from which ſubtracting 51, I have 137 the Number of Days required. Or if I would know the Number of Weeks in the aforeſaid Time, having found the Number of Days as before to be 137, I divide them by 7, and the Quotient gives me the Anſwer, *viz.* 19 Weeks, and 4 Days over.

The *Second* Column is for the Days of the Month.

The *Third* Column is for the Days of the Week, Feſtivals, and Remarkable Days. The Days of the Week are here named at large, which Alteration from the common Method has been approved of by all thoſe, who bought this Almanack for the laſt Year.

The *Fourth* Column is for the Time of the Sun's Riſing and Setting every Day in the Year. The Letters over the Figures ſtand H. for Hours, M. for Minutes, and H. again for Hours. And the Figure in the middle ſerves to read both with the Figure going before it, and alſo with the Figure following it. Thus on *January* 1, the Figures 8, 9, 4, are read thus. The Sun riſes that Day at 9 Minutes after 8 in the Morning, and ſets at 9 Minutes before 4 in the Evening. Thus alſo, on *January* 31, the Sun riſes 9 Minutes after 7, and ſets 19 Minutes before 5.

The *Fifth* Column is for the Days of the Moon's Age.

The *Sixth* Column is the Gregorian Kalendar or New Stile, by which ſeveral of the Countries abroad do reckon their Time. The uſe of it is this. If in a News Paper, or other Letter, I find any thing mentioned is done on *January* 12, with the Letters N. S. or *New Stile* added to it, I underſtand, that That Thing was done on our 1 *January*. Thus alſo, their 1 *Febr.* is our 21 *January*.

The *Laſt* Column is a Table of Equation of Days, and ſhews by Inſpection, how much faſter or ſlower than a true Sun-Dial, good Clocks or Watches will go every Day this Year. Thus, for Example, if you ſet a Clock or Watch, as it ſhould be, on *January* 1, *viz.* 8 Minutes, 59 Seconds after than the Sun-Dial, It ought on *January* 2, to go 9 Minutes, 21 Seconds faſter than the Dial, and ſo on every Day (faſter or ſlower) according to the Table of Equation. The Letters over the Figures ſtand M. for Minutes, and S. for Seconds. The Letter F. ſtands for *Faſter*; and is underſtood to be in every Column under it, till you come to the Letters Sl. which ſtand for *Slower*, And theſe are alſo underſtood to be in every Line under them, till you come again to the Letter F. Noon is the beſt Time of the Day for Setting or Comparing your Watch or Clock.

The Explanation of the following ALMANACK.

After the Kalendar ſome uſeful Tables follow, *viz.*

1. THE *Tide-Table*, explained in the ſame Page, where it is printed.

2. A *Table of the Price of Goods* by the long Hundred. Where, for Example, if I would know the Price of the Hundred at 3 Pence 3 Farthings per Pound, I look in the Column of (the Value of 1*l.*) till I come to 3*d.* 3*q.* oppoſite to which, in the Column of (the Value of 112*l.*) immediately following, I find 1*l.* 15*s.* the Anſwer.

3. The *Poſt-Towns* in *Ireland*, corrected from the Books in the Poſt-Office.

4. A Table of the Beginning, Ending and Length of Morning and Evening *Twilight*, and is read thus. For Example, on *January* 1, Morning *Twilight* begins 55 Minutes after 5. Evening *Twilight* ends 5 Minutes after 5. The Length of *Twilight* is 2 Hours 14 Minutes.

5. A *Table of Coin*, where, for Example, to know how much 18 *Engliſh Crowns* are, oppoſite to 18 in the Margin, and under *Engliſh Crowns*, I find 4*l.* 17*s.* 6*d.* the Anſwer. So for 40 *Piſtoles*, oppoſite to 40, and under *Piſtoles*, I find 37*l.*

6. A *Table of Intereſt*, where, for Example, to know the preſent legal Intereſt of 40*l.* for 5 *Months*, oppoſite to 40 in the Margin, and under 5 *Months*, I find the Anſwer 1*l.* 3*s.* 4*d.*

7. A *Table of Purchaſe*, where, for Example, to know what a yearly Rent of 19 Years is worth in ready Money at 7 *per Cent.* oppoſite to 19 in the Margent, and under 7 *per Cent.* I find 10 Years, 4 Months. That is to ſay, It is worth 10 Years, and 4 Months Rent paid in Hand.

8. A *Table of the Weight of Houſhold-Bread*, where for Example, if the Price of the Quarter with Allowance be 2*l.* 3*s.* I find the ſix Penny Loaf ought to weigh 6*l.* 7*oz.* 4*dr.* And the Twelve-penny Loaf ought to weigh 12 *l.* 15 *oz.*

9. The *Swearing Days* of the Maſters of the ſeveral Corporations of *Dublin*. Here you have alſo the Names of the Maſters elected before *October* 1729.

10. The Names of the Lord Lieutenant, and ſeveral other Remarkable Names.

11. The Marriages and Iſſues of the preſent Sovereign Princes of *Europe*.

12. The Deaths of the late Kings and other Princes of *Europe*.

13. The Principal Roads and Fairs of *Ireland*. In which laſt, it is none of the Publiſher's Fault, if there be any material Miſtakes or Omiſſions this Year: But if there be, Gentlemen know where they may ſtill have them carefully mended in theſe Almanacks for the next and following Years.

To find when it will be high Water at the Bar of *Dublin*, as Example on the 22d of *Decem.* this Year, in the Column of Moon's Age, I find her 24 Days old, then looking for the Bar *Dublin* in this Table, and 24 Days old in the first Column, the Angle of meeting, I have 5 42, which shews that at 42 *in*, after 5 in the Afternoon it will be high Water there.

A Table, which by knowing the Price of the Pound, readily shews the Price of the hundred Weight; or, by knowing the Price of the hundred Weight, shews the Price of the Pound; from 1 Farthing *per* Pound, to 2*s.* *per* Pound, according to 112*l.* to the Hundred.

Value of 1*l.*		Value of 112*l.*
